EASY TO CONNECT

1. Select pairing mode on XT sprayer
2. Press + / - on the PowerPak System

UP TO 60 METRES OF
COMMUNICATION!

NEXT GENERATION PERFORMANCE

REMOTE PRESSURE ADJUSTMENT

- Easily dial-in to your desired pressure to meet the performance of every job – delivering extreme spray control
- Offers the fastest & easiest way to adjust spray pressure right from where you are spraying - no more walking back to sprayer to adjust pressure right from the ladder or boom lift
- Potentiometer and remote pressure control work seamlessly together – whatever was last adjusted becomes your spray pressure
- Precision pressure adjustments up to 60 meters away - even through walls and other obstructions!

NEXT GENERATION PERFORMANCE

SMARTSTALL™ - SPRAY AT EVEN LOWER PRESSURES!

- Traditional Sprayers are not responsive enough - the pump continues to run when the gun is shut off
- This is the reason the stall pressure is much higher than run pressure – the system is too slow to respond.
- Introducing SmartStall - The industry's first system that shuts the pump off when the trigger is released

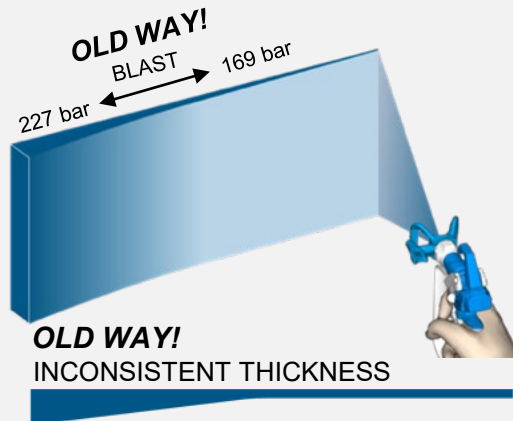

SmartStall Delivers:

- ✓ The Most Responsive Sprayer Ever Built
- ✓ The Most Consistent Run & Stall Pressure
- ✓ Automatically Eliminates The Material Blast
- ✓ Best Airless Finish Quality
- ✓ Reduced Fatigue
- ✓ Reduced Wear On Every Component In The System

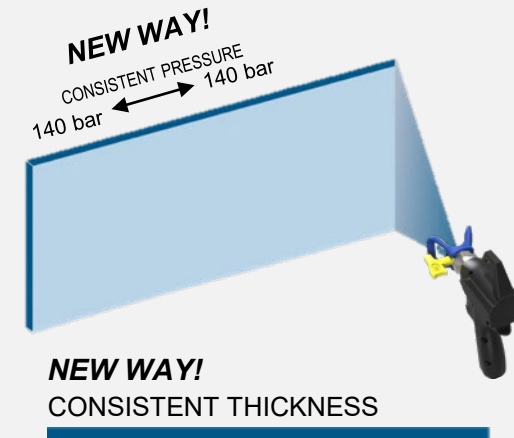

PATENT PENDING

Automatically Makes A Novice Painter Deliver A Superior Finish!

Incorrect Pressure Setting Leads To:

- ✗ Potential Cracking When Dry
- ✗ Potential for Poor Finish (Runs)
- ✗ Excessive Tip and Pump Wear
- ✗ Inconsistent Sheen
- ✗ Inconsistent Mil Build
